

POST-DOCTORAL Fellow Position in Signal Transduction

The **Signal Transduction Research Group** (www.ua.pt/cbc) from the Center for Cell Biology, University of Aveiro will support candidates applying to the next FCT call for **post-doctoral** fellowship.

The Post-doctoral research fellow will collaborate in the areas of signal transduction in health and disease. Particularly in elucidating the role of Protein Phosphatase 1 and its regulators in male (in)fertility and cancer. The Post-doctoral research fellow will be actively involved in identifying and validating novel molecular markers.

The successful candidate is expected to contribute to the research activities of the group, including development, and implementation of new techniques.

Application: Please send a CV, a motivation letter and the names and contacts of at least two senior researchers for reference (recommendation letters are optional), no later than **31st May 2011**, to:

Margarida Fardilha (mfardilha@ua.pt)
Signal Transduction Lab
Centre for Cell Biology
Dep de Biologia, Universidade de Aveiro
Campus de Santiago
3810-193 Aveiro
Portugal

Note: The pre-selected candidate (pending CV evaluation and interview) will be supported with their application (prepared with the assistance of the head of the research group) for a post-doctoral grants from the Fundação para Ciência e a Tecnologia (<http://alfa.fct.mctes.pt/apoios/bolsas/concursos>). The final decision for grants attribution will thus be the responsibility of the FCT according to pre-defined criteria.
